Agility

Points will be accepted from the following venues: NADAC, USDAA, AKC, UKC, and CPE. The maximum number of agility points available is 17. The maximum available to any dog who has not achieved any agility championship is 14. To determine your dog's points, figure out the highest-earning title combination your dog has (for example, EAC and EJC together are 9 points). Then for titles in additional venues, regardless of the level of the titles (as long as the title is worth at least one point by itself), add one point up to two points total. For example, a PDII would be one additional point, and an OA and OAJ would be worth one additional point.

Then for titles in additional venues, for any title higher in level than an instinct test, add one point up to two points total (for example, an AKC PT would be one additional point, and an AHBA HTDI would be worth one additional point). Multiple instinct tests in multiple venues are worth one point total.

When submitting your herding points earned, a minimum of 50% of those points earned must be from a judged trial such as MASCA, ASCA, AHBA and AKC venues offer, and the remaining amount can be earned from time and points trials such as the NAMASCUSA herding venue offers.
